HOBS WITH INTEGRATED EXTRACTOR

The modern extractor solution offers one thing above all – more freedom: A clear view, as the fumes are extracted directly where they arise. Odourless cooking and more freedom in kitchen planning.

High-quality filter systems allow nothing but fresh air to be produced, while still being powerful and noise-free. The perfect combination of heat and air in a single appliance.

Perfectly planned – Hob with an extractor fan

Perfect integration in the kitchen cabinet makes integrated design and maximum functionality possible in the first place. Thanks to the slim and space-efficient design, the appliances allow a greater use of your cabinet and drawer spaces.

SHORTER DISTANCE – MORE EFFICIENT EXTRACTION – FRESHER AIR

The downdraft extractor ensures that cooking fumes do not even escape to the room and are instead filtered directly.

BETTER POSITIONING – ENJOYABLE COOKING

The intelligent fusion of a hob and extractor fan saves you from an unfavourable eye-level appliance position. Thanks to the direct downdraft extraction of the fumes, you keep a clear view.

FEWER APPLIANCES – PLANNING WITHOUT LIMITS

The absence of the additional appliance at head height opens up new possibilities in kitchen planning. Positioning the hob in the centre of the room or directly in front of the window allows you a clear view: no more limits stand in your way.

EASIER TO ACCESS – EASIER TO CLEAN

The filter technology ensures excellent absorption of moisture. To clean, you can access the filters easily and practically from above, rendering a tedious disassembly unnecessary.

EFFICIENT TECHNOLOGY – MAXIMIZED PERFORMANCE

Optimized extraction paths, powerful motors and a perfectly balanced flow rate ensure maximum performance.

RELAXING COOKING EXPERIENCE

Installation at base height shifts the sound field from the eye level downwards. Especially quiet motors give you additional peace and quiet.

QUALITY FROM SELECTION TO WORKMANSHIP

Functionality and longevity are the result of the use of high-quality materials and precise workmanship.

Here you can find all information about our hob fans.

Stand-alone hob, induction with integrated extractor fan 5IX 99290AU

Output, consumption – hob

- Voltage: 220 – 240 V
- Total connected load: 8.8 kW
- 4 induction cooking zones with booster: 4 cooking zones Ø 22 cm, 2.1 kW (3.7 kW)

Design, comfort – hob

- Frameless
- Touch control with Smart Slider
- Boost function for all induction cooking zones
- Electronic control in 10 power levels
- Main switch for hob and extractor fan
- Toggle function with fixed temperatures (40 °C, 70 °C und 98 °C)
- Cooking Chef Mode, Pause and Recall
- Residual heat display
- Pot detection
- Child lock
- Timer
- Countdown function
- 2 x bridging function
- Flush-mounted installation possible

Dimensions H x W x D

- Appliance dimensions: 82.7 – 98.2 x 90 x 53 cm
- Installation dimensions: 5.8 x 86.2 x 49.5 cm

Planning information

- Air outlet / exhaust air duct to the left
- It is not possible to plan in dishwashers, underframe coolers, base drawers, etc. in the exhaust air routing area
- For the circulation variant, it is not possible to plan in dishwashers, underframe coolers, base drawers, etc. directly on the left side
- Min. cabinet width 900 mm
- Worktop depth min. 600 mm (correspondingly deeper for the planning of recess panelling)
- Plint height min. 100 mm

Output, consumption – extractor fan

- Voltage: 220 – 240 V
- Total connected load: 165 W
- Average power consumption: 30.8 kWh / year
- Noise min. / max. normal level / intensive level: min 45 dB (A) max. 65 dB (A) max. 70 dB (A)
- Fan output max. normal level / intensive level*: In extraction mode 580 m³/h / 730 m³/h In circulation mode 45 m³/h / 560 m³/h

Design, comfort – extractor fan

- Electronic opening of the extractor fan
- Glass ceramic, black
- Suitable for installation in a kitchenette or kitchen island
- Optional extraction or circulation mode (for circulation mode a carbon filter is required)
- 6-level fan output controllable via Touch Control with 7-segment LED display
- 5 power levels + 1 intensive level
- Intensive level with automatic reset for extraction mode
- Automatic three-level blower overrun of 5 / 10 and 20 minutes with LED display
- Metallic grease filter and carbon filter saturation indicator via LED warning light
- For the cleaning / emptying of metallic filters and water collection vessels, the appliance automatically blocks after 40 hours of operation
- Automatic overrun for circulation mode
- Water collection tank: 0.75 litre capacity
- Powerful and quiet blower
- Metallic grease filter, dishwasher-safe

Blaupunkt Multi Control – a unique connection

Here everything comes together that belongs together: Blaupunkt hobs with Multi Control  form a unique combination – together with the Multi Control extractor fan hoods. These can be easily controlled using the hob operating panel, and they automatically adjust their output in line with the heat generation of the hob. The cable-free Multi Control sensor promises a long-lasting technical standard and intuitive operation.

BLAUPUNKT SINKS

Choosing the right material for your kitchen sink is essential to ensuring that you enjoy using it for years to come. Because of this, all Blaupunkt sinks are manufactured of highly robust quartz composite. It consists of 80 % natural quartz sand – the hardest component that makes up granite – and 20 % acrylic resin. The surfaces of the sinks are slightly rough, but not porous – they feel like stone, yet warm.

Smart slider

An intuitive, simple control concept for all appliances – every setting can be perfectly selected with the Smart Slider.

Touch Control

Precise, innovative and very user-friendly: gently touching the Touch Control buttons is enough to select the desired setting.

Automatic programmes

One touch away from the perfect result: our automatic programmes are equipped for nearly every ingredient. Cooking can't get any easier.

Soft Moving

Thanks to its advanced dampers and hinges, the oven door can be opened and closed smoothly. Just a light pull/push and the door opens or closes gently.

Steam cooking

Cooking with hot steam is gentle to the food, promises maximum taste and a healthy approach to your cooking.

Pyrolyse

With a simple touch, all residues from baking, frying and grilling at high temperatures are reduced to ashes that can be simply wiped away with a cloth.

Induction

Immediately hot, immediately cold, and nothing gets burnt. The base of the pan is directly heated by the induction coil. The heat is only produced where it is needed. This means short heat-up times, more safety and much less energy consumption.

Combi induction

Two induction cooking zones can be combined together to create one single cooking zone, thereby allowing the use of very large pots and pans. Of course, the two large cooking zones can also be used separately.

Multi Control

The extractor fan hood and hob are intelligently linked. The extractor fan hood can be controlled separately using the hob control panel and automatically adjusts the fan power to the heat generated.

LED

The innovative LED lights of Blaupunkt extractor fan hoods ensure even more light on the hob. Another ray of hope: the long-lasting lights consume an extremely low amount of energy.

Air Fry

The hot-air fryer in your oven. Crispy results with little fat.

Water

Cutlery drawer

Thanks to the cutlery drawer, your cutlery can be optimally placed for the washing process. This guarantees optimal cleaning results.

Aquastop

A lifelong warranty against water damage. The Aquastop safety system prevents all kinds of water damage – whether on the supply hose or due to a leak in the machine.

Extra quiet

More durable, efficient and particularly quieter motor.

Vario basket

The upper basket is height-adjustable and may be equipped with up to two racks depending on the model. The lower basket has two folding spine rows.

Digital display

A digital display gives you a good overview of the selected programme and the cycle time.

Cold

NoFrost

The NoFrost system drains the humidity from the freezer and prevents the formation of ice on the inner walls and hoarfrost on the food.

Super Freezing

With the Super Freezing function, the item is cooled down to -30°C so that newly stored food does not interrupt the freezing process.

Electronic control

With electronic temperature control, Blaupunkt refrigerations always have the right temperature. It can be read exactly at any time via the digital LED display.

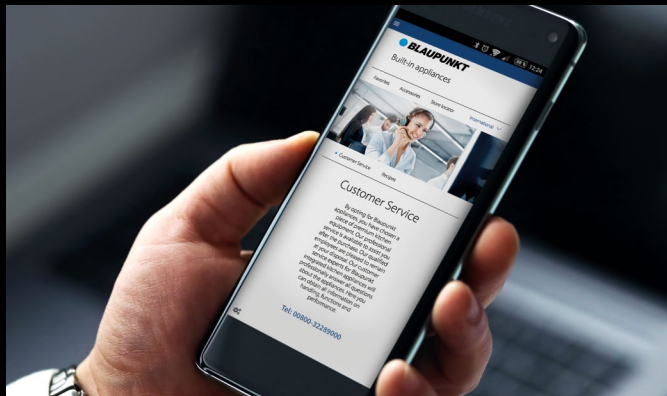

LED light

The long-lasting LED lights are integrated flat in the side walls and illuminate the interior uniformly and perfectly.
